

Get set up on the DV VeloViewer leaderboard and see how many of the 20 segments you can visit this year and how your times compare against others in DV.

First Time Setup

1. You need to be a Strava subscriber to make full use of the leaderboard. If you don't pay for Strava then you probably won't see your data on the leaderboard.
2. You need to be in the DV Strava Club. If you're not in it already then request to join here <https://www.strava.com/clubs/DittonsVelo>
3. You need to register with VeloViewer and connect to Strava to see the leaderboard. This is FREE or you can choose PRO membership (<https://blog.veloviewer.com/veloviewer-free-vs-pro/>) which will give you some cool extra features. You don't need a PRO membership but it's also a nice way to give back to the VeloViewer team (2 people) who provide this to us for free. <https://veloviewer.com/>

4. Once you've connected you can go to the DV Leaderboards and see how you're doing. Suggest you bookmark these links in your browser. You need to have ridden at least one segment before you appear.

5th	3 / 20	Oscar Whicheloe			1st 03:55					

Every time you ride one of the segments your data will be saved in Strava.

To make sure that time appears on the VeloViewer you need to visit the leaderboard and hit the red **Update Your Times** button.

When you ride a segment for the first time, or if you improve on your previous best time, the leaderboard will update.
